FOR IMMEDIATE RELEASE

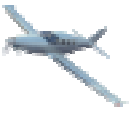

### **All New Epic “Dynasty” a VLJ to Debut at NBAA!**

**Calgary, Alberta** (October 12, 2006)—With more than a 1000 hours of flight testing already logged toward certification, the Epic Dynasty will fly in for display at the upcoming 59<sup>th</sup> Annual National Business Aviation Association Convention in Orlando, Florida, October 17-19, 2006.

The system conforming single-engine pressurized Dynasty is already pushing the performance envelope in the VLJ category. The Dynasty can take off with full fuel and all six seats occupied, then climb into the flight levels and cruise at up to 340 knots. The certified ceiling on the Pratt & Whitney-powered Dynasty is expected to be 32,000’ with an IFR range of 1874nm with optional long range tanks.

“From the beginning, the Dynasty was designed to be the fastest, most comfortable and most economical VLJ,” said Epic’s Chief Executive Officer, Rick Schrameck. “The Dynasty delivers jet performance at a fraction of the cost of a twin turboprop or fanjet VLJ.”

The announcement of the Epic Dynasty Transport Canada Certification was revealed last month during an internationally televised press conference in Calgary, Alberta, where representatives from the Canadian Center for Aircraft Certification (CCAC) announced plans to begin certifying high technology general aviation aircraft. Agreements between Transport Canada and the Federal Aviation Administration ensure certification standards are reciprocal between the United States and Canada.

The Epic Dynasty will be the first aircraft certified by the new Canadian Center for Aircraft Certification, followed immediately by the Epic Elite, the company's new twinjet turbofan.

Certification of the Dynasty VLJ is expected in the 2<sup>nd</sup> half of 2008. Epic has already begun accepting deposits on the new VLJ "Dynasty", which is priced at \$1.9m.

Join the Epic team and strategic alliances for a press conference at the NBAA Tuesday, October 17<sup>th</sup> at 1pm. Detailed information about the program will be presented along with an update on the Elite jet program. Press conference room N220D.
